Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-14 are objected to because of the following informalities:

In claim 1, line 15, the word "positioned" should be changed to --position--.

In claim 1, line 6, the word --said-- should be added in front of the word apertures.

Similar correction should be made to claim 14, line 6.

In claim 1, line 7, the word --said-- should be added in front of the phrase threaded bolts. Similar correction should be made to claim 14, line 7.

In claim 6, line 13, the word "positioned" should be changed to --position--. Similar correction should be made to claim 14, line 27, claim 14, line 46.

In claim 1, line 9, the word have should be changed to --having--. Similar correction should be made to claim 14, line 10.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Rollings (US 2,212,076).

Rollings discloses a road gripping assembly for removably positioning on a vehicle wheel, the vehicle wheel including a rim having a plurality of threaded bolts (15)

Art Unit: 3617

extending therethrough, said assembly including a hub (18 with integral plate 23) having an inner surface, an outer surface and a peripheral edge, said hub having a plurality of apertures extending therethrough, wherein the number of apertures equals the number of threaded bolts (31), each of said apertures being positioned for selectively receiving one of said threaded bolts; a plurality of telescopic arms (22) each have an attached end being attached to said peripheral edge and a free end extending outwardly away from said hub; a plurality of gripping members (48), each of said gripping members being pivotally coupled to one of said free ends such that said gripping members are selectively positionable in a stored position adjacent to a side wall of the wheel or in a gripping position abutting threads of the wheel.

The plurality of telescoping arms (22) are spaced generally equidistant from each other in accordance with claim 2, 4-5.

The plurality of telescoping arms includes five arms in accordance with claim 3.

Allowable Subject Matter

4. Claims 6-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claim 14 stand allowable.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Art Unit: 3617

Etter, Jones, Armenante et al, Montenare are cited to show related road gripping assembly comprising pivotable gripping members.
